

Ancient 17,000-Year-Old Remains Hint at First Blue Eyes

Description

A child lived 17,000 years ago. He was born with a heart problem and had the first known blue eyes.

Researchers found his remains in Italy. They believe he had blue eyes, dark skin, and curly dark brown or black hair.

This child could not digest milk as an adult. He likely had thick heart muscles because of a genetic condition. He was very small, measuring only 82 centimeters (about 32 inches) long, and he lived for about 7.5 to 18 months.

Scientists studied his teeth and found he had a difficult birth. He also faced other challenges in his short life.

The research shows he had heart disease. His mother may have had a hard time during her pregnancy and might have been not well-nourished.

The child's remains were discovered in a cave in Puglia, Italy, in 1998. He was found without any toys or clothes.

This child's blue eyes came from a gene change that reduces the brown pigment in eyes.

This study was published in the journal *Nature Communications*.

Vocabulary List:

1. **Researchers** /rɪ'sɜːr.tʃərz/ (noun): Individuals who conduct studies and investigations to acquire knowledge.

Vocabulary quizzes

Multiple Choice (Select the Correct answer for each question.)

1. What term refers to marking the 100th anniversary of an event?

-
- Option: Illuminate
Option: Centennial
Option: Celebrate
Option: Researchers
2. Which term relates to inherited traits passed down from parents?
Option: Alveolar
Option: Genetic
Option: Filament
Option: Protein
3. What is the study of nutrients and their effects on health?
Option: Disease
Option: Nutrition
Option: Published
Option: Limit
4. Which term means to restrict or set a boundary?
Option: Filament
Option: Risk
Option: Limit
Option: Condition
5. Which term describes something containing a high amount of sugar?
Option: Symbol
Option: Epidemiologist
Option: Sugary
Option: Remains
6. Which condition affects the heart and its functioning?
Option: Genetic
Option: Heart Disease
Option: Research
Option: Soft
7. What term refers to the act of making information available to the public?
Option: Published
Option: Protein
Option: Soft
Option: Digest
8. Which term refers to a slender thread-like structure?
Option: Celebrate

- Option: Condition
- Option: Filament
- Option: Repair

9. Who studies the distribution and determinants of health and disease in populations?

- Option: Soft
- Option: Epidemiologist
- Option: Alveolar
- Option: Categorized

10. Which term refers to what is left after something else has been removed?

- Option: Protein
- Option: Nutrition
- Option: Risk
- Option: Remains

Gap-Fill (Fill in the blanks with the correct word from the vocabulary list.)

11. A _____ pillow is comfortable to sleep on.
12. Many _____ are working on finding a cure for cancer.
13. There are various _____ available for arthritis to manage the symptoms.
14. The _____ sacs in the lungs facilitate the exchange of oxygen and carbon dioxide.
