

Boost Your Immunity: Effective Health Hacks Revealed

Description

The United Nations recently hosted a big climate summit in New York. This meeting, called the Climate Action Summit, focused on urgent steps to address global climate change. Many world leaders and representatives participated to discuss how to reduce carbon emissions and protect the planet.

United Nations Secretary-General António Guterres emphasized the importance of this summit. He told the participants that the world needs immediate action to prevent serious climate problems. He urged countries to move away from using coal, oil, and gas and to invest more in renewable energy like wind and solar power.

One of the main highlights of the summit was the participation of young climate activists. They insisted that governments should not just talk but take real actions to combat climate change. These young people stressed the need for immediate changes to ensure a healthier planet for future generations.

Several countries shared their new plans at the summit. For example, some nations promised to cut down on their carbon emissions more quickly, while others pledged to end deforestation. Many countries also agreed to support developing nations that are experiencing the worst effects of climate change.

The summit was not only about promises but aimed to serve as a platform for real changes. António Guterres encouraged all countries to take responsibility and act swiftly to meet their pledges. He reminded everyone that addressing climate change is a global effort, and every nation needs to do its part.

Overall, the summit offered hope that with collective efforts, countries can work together to tackle climate challenges and ensure a sustainable future.

Vocabulary List:

1. **Emissions** /ɪˈmɪʃənz/ (noun): The act of releasing something especially gas or pollutants into the atmosphere.
2. **Deforestation** /ˌdiː.fɒr.ɪˈsteɪ.ʃən/ (noun): The process of clearing forests or trees for other uses leading to loss of habitat and biodiversity.

6. **Collective** /kəˈlek.tɪv/ (adjective): Done by people acting as a group.

Comprehension Questions

Multiple Choice

1. Who emphasized the importance of the Climate Action Summit?
Option: António Guterres
Option: Young climate activists
Option: World leaders
Option: Developing nations
2. What type of energy did António Guterres urge countries to invest more in?
Option: Coal
Option: Oil
Option: Wind and solar power
Option: Gas
3. What was one of the main highlights of the climate summit?
Option: Deforestation
Option: Carbon emissions reduction promises
Option: Global warming debates
Option: Oil drilling advancements
4. What did young climate activists stress the need for?
Option: Increased greenhouse gas emissions
Option: Immediate changes
Option: Investing in coal
Option: Ignoring climate change
5. What did many countries agree to support at the summit?
Option: Carbon emissions increase
Option: Deforestation
Option: Advancements in coal usage
Option: Developing nations affected by climate change
6. What did António Guterres remind everyone about addressing climate change?
Option: It is a personal responsibility

- Option: It is a global effort
- Option: It is unnecessary
- Option: It is a political game

True-False

- 7. The Climate Action Summit was hosted in Paris.
- 8. The summit focused solely on making promises without any real actions.
- 9. António Guterres encouraged countries to act swiftly to meet their pledges.
- 10. Young climate activists did not participate in the summit.
- 11. Countries agreed to invest more in fossil fuels at the summit.
- 12. The summit aimed to ensure a sustainable future.

Gap-Fill

- 14. António Guterres urged countries to move away from using _____, oil, and gas.
- 16. Several countries shared their new plans at the summit to address global _____ change.
- 17. The summit offered hope that with collective efforts, countries can work together to tackle climate challenges and ensure a _____ future.
- 18. António Guterres reminded everyone that addressing climate change is a global _____.

Answer

Multiple Choice: 1. António Guterres 2. Wind and solar power 3. Carbon emissions reduction promises 4. Immediate changes 5. Developing nations affected by climate change 6. It is a global effort

True-False: 7. False 8. False 9. True 10. False 11. False 12. True

Gap-Fill: 14. coal

16. climate 17. sustainable 18. effort
