Can AI conquer the Spelling Bee if it's set to take over the world?

Description

I was struggling to crack the New York Times Spelling Bee, so I turned to AI for help. After inputting my letters, the AI generated some words, but they were not in the dictionary. I tried different AI models like Microsoft's Copilot and Google's Gemini, but none of them could solve the puzzle. The problem lies in how AI models are trained; they are not optimized for word puzzles like the Spelling Bee. AI operates statistically, not logically like traditional computer programming. Despite marketing claims, AI still has limitations and cannot perform tasks like reasoning and planning as effectively as humans can. Experts like Yann LeCun have emphasized that current AI models lack true understanding of the world and human-like intelligence. While AI has made advancements in various areas, it still struggles with certain tasks, such as solving word puzzles. Understanding these limitations is crucial when using AI technology.

Vocabulary List:

1. **Struggling** // (verb): Having difficulty to do or achieve something.
2. **Crack** // (verb): To solve or decipher something.
3. **Optimized** // (verb): Made as effective or functional as possible.
4. **Reasoning** // (noun): Thinking about something logically.
5. **Advancements** // (noun): Developments or improvements in a particular area.
6. **Limitations** // (noun): Restrictions or weaknesses that make something less effective.

Comprehension Questions

Multiple Choice

1. What is one of the AI models mentioned in the text that the user tried?

    Option: Microsoft's Copilot
    Option: Google's Gemini
    Option: IBM Watson
    Option: Amazon Alexa

2. How does AI operate in relation to traditional computer programming?

Option: Statistically
Option: Logically
Option: Creatively
Option: Emotionally

True-False

3. AI models like Microsoft's Copilot and Google's Gemini are optimized for solving word puzzles like the Spelling Bee.

4. Yann LeCun believes that current AI models have a full understanding of the world and human-like intelligence.

Gap-Fill

5. AI cannot perform tasks like reasoning and planning as effectively as _____ can.

6. Understanding AI technology limitations is crucial when using AI for tasks such as solving word

_____ .

Answer

Multiple Choice: 1. Microsoft's Copilot 2. Statistically
True-False: 3. False 4. False
Gap-Fill: 5. humans 6. puzzles

Vocabulary quizzes

Multiple Choice (Select the Correct answer for each question.)

1. Which of the following words means to exhibit or display something prominently?

Option: Efficiency
Option: Showcase
Option: Lapses
Option: Advancements

2. What term is used to describe the climate of a small or restricted area?

Option: Microclimate
Option: Plethora
Option: Cultish
Option: Optimized

3. Which geological feature is a large volcanic crater formed by a major eruption?

Option: Calderas
Option: Gyroscopes
Option: Expansion
Option: Struggling

4. Which term refers to a system of measurement based on the meter kilogram and second as units?

Option: Aspirational
Option: Geological
Option: Metric
Option: Reasoning

5. In computing what is the term for the state of an electronic device when it is operating with reduced functionality?

Option: Compatible
Option: Observatories
Option: Safe mode
Option: Limitations

6. Which term describes regions on Earth that are located near the equator?

Option: Equatorial
Option: Consequences
Option: Volcanoes
Option: Remove

7. What do we call the clear understanding of a complex situation?

Option: Omit
Option: Expansion
Option: Insights
Option: Crack

8. Which term refers to the action of thinking about something in a logical sensible way?

Option: Volcanoes
Option: Reasoning
Option: Intrigue
Option: Prominently

9. What term describes having difficulty and making efforts to overcome a challenge?

   Option: Gyroscopes
   Option: Struggling
   Option: Achievements
   Option: Geological

10. Which word signifies progress improvements or developments?

   Option: Aspirational
   Option: Advancements
   Option: Clarity
   Option: Geological

Gap-Fill (Fill in the blanks with the correct word from the vocabulary list.)

11. For the software to work properly it needs to be _____ with your operating system.

12. Many young entrepreneurs have _____ goals of building successful global

businesses.

13. The company implemented new strategies to ensure its processes were _____

for maximum efficiency.

14. The study of rocks minerals and Earth's structure falls under the field of _____

sciences.

15. One major _____ of the current technology is its inability to handle large volumes of

data.

16. The new shopping mall offers a _____ of dining options ranging from fast food to fine

dining.

17. Many modern devices such as smartphones contain _____ for orientation and

stability purposes.

18. Every decision we make has potential _____ that we need to consider.

19. The astronomers used the latest telescopes at the _____ to study the newly

discovered comet.

20. Improving the company's processes led to increased _____ and higher overall

productivity.

Matching Sentences (Match each definition to the correct word from the vocabulary list.)

21. The plot of the mystery novel was so captivating that it sparked curiosity and fascination in readers.
22. The art gallery decided to local talent by holding an exhibition for emerging artists.
23. The company's successful year marked a period of rapid growth and into new markets.
24. The followers of the group displayed behaviors that were considered overly devoted and exclusive leading to accusations of being .
