

Cardiac arrest and COVID vaccines aren't linked in young, CDC says

Description

The US Centers for Disease Control and Prevention (CDC) has stated that the COVID-19 vaccine does not cause sudden heart death in healthy young people. This information comes from a study carried out between June 2021 and December 2022. The study looked at the medical records of 1,292 young people from Oregon, USA who died from unknown heart problems.

The CDC found no link between the vaccine and sudden heart death. The vaccine is still recommended for everyone aged six months or older.

Some people had concerns about the vaccine because of reports of myocarditis, a condition causing heart inflammation, especially in young men. These reports came about when the vaccine was first made available to young people in 2021. This led the CDC to investigate the issue.

According to the data, the risk for heart problems was higher after a COVID-19 infection than after the vaccine. Therefore, the CDC recommends vaccination and booster shots for people over six months old to prevent COVID-19 and any serious complications or deaths.

Vocabulary List:

1. **CDC** // (abbreviation): Centers for Disease Control and Prevention
2. **COVID-19** // (noun): Coronavirus Disease 2019

5. **infection** // (noun): The process of infecting or the state of being infected
6. **booster** // (noun): An additional dose of a vaccine to increase or restore immunity levels

Vocabulary quizzes

Multiple Choice (Select the Correct answer for each question.)

1. Which of the following is a neurodevelopmental disorder characterized by impaired social interaction and communication?

Option: Canine

Option: Autism

-
- Option: Lethal
Option: Vaccine
2. Which imaging technique measures brain activity by detecting changes in blood flow?
Option: Fluctuations
Option: Sync
Option: fMRI
Option: Desync
3. Which organization provides information and recommendations to prevent the spread of diseases?
Option: Avert
Option: CDC
Option: Imply
Option: Shrinkage
4. Which term refers to dishonest or fraudulent conduct by those in power?
Option: Optimize
Option: Corruption
Option: Stigma
Option: Reluctant
5. Which virus led to the global pandemic in 2020?
Option: Infection
Option: Booster
Option: COVID-19
Option: Myocarditis
6. What term describes a mistaken belief or idea about something?
Option: Advocating
Option: Misconception
Option: Opposed
Option: Highlighted
7. Individuals who live to be 100 years old are known as:
Option: Archipelago
Option: Centenarians
Option: Geriatrics
Option: Canine
8. Which term means to occur at the same time or rate?
Option: Desync
Option: Cognitive
Option: Sync

Option: Optimize

9. Which word describes publicly supporting a particular cause or policy?

Option: Stigma

Option: Advocating

Option: Reluctant

Option: COVID-19

10. Which medical product is used to stimulate the immune system to provide immunity against specific diseases?

Option: Vaccine

Option: Doubting

Option: Opposed

Option: Highlight

Gap-Fill (Fill in the blanks with the correct word from the vocabulary list.)

11. Some people are strongly _____ to the new regulation.

12. She was _____ to accept the offer at first.

13. The timely action helped _____ a major disaster.

14. The company experienced significant _____ in its profit margin.

15. The report _____ the urgent need for policy changes.

16. The stock market is known for its constant _____.

17. Let's make sure our schedules _____ for tomorrow's meeting.

18. The audio and video were _____ during the live stream.
