

Cate Blanchett Worried About Artificial Intelligence Impact.

Description

Cate Blanchett shared her concerns about the impact of artificial intelligence (AI) in a recent interview with the BBC. The Australian actress expressed worry about how robots and driverless cars are changing our world, saying, "I'm not sure how these advancements are benefiting society."

During the interview, Blanchett also talked about her new film, *Rumours*, which is a comedy about world leaders stuck in a forest. She compared the film to reality, saying, "Our movie seems tame compared to what's happening in the real world."

When asked about the effect of AI on her career, Blanchett admitted she's more concerned about its impact on ordinary people. She emphasized the danger AI poses, as it can potentially replace anyone, even creatively through voice replication.

Blanchett, who has won two Oscars for her acting, criticized AI advancements as being more about experimentation than actual progress. She warned about the destructive side of technology, calling it both creative and harmful.

In *Rumours*, Blanchett plays the Chancellor of Germany at a G7 summit. She clarified that the political characters in the film are not based on real-life figures, allowing audiences to interpret the movie's themes freely. The director, Guy Maddin, explained that he intentionally creates characters to evoke mixed feelings, shifting from contempt to sympathy as the story unfolds.

Overall, Blanchett and Maddin's work in *Rumours* sheds light on the artificiality and vulnerability of political figures in a rapidly changing world.

Vocabulary List:

1. **Artificial** /ˌɑːtɪˈfɪəl/ (adjective): Made or produced by human beings rather than occurring naturally.

True-False: 7. False 8. False 9. True 10. False 11. False 12. True

Gap-Fill: 13. vulnerability 14. acting 15. contempt 16. replacing 17. benefits 18. Guy Maddin

Vocabulary quizzes

Multiple Choice (Select the Correct answer for each question.)

1. What small rocky object orbits the sun?

- Option: Meteorite
- Option: Asteroid
- Option: Fireball
- Option: Fragment

2. What is the result of an object hitting another object with great force?

- Option: Collaboration
- Option: Impact
- Option: Settlement
- Option: Insights

3. What term relates to the application of scientific knowledge for practical purposes?

- Option: Fluorescent
- Option: Technological
- Option: Meteorite
- Option: Marangoni

4. What term describes something causing great harm or damage?

- Option: Evoke
- Option: Destructive
- Option: Secreting
- Option: Revolutionize

5. What term relates to hot water rising from the Earth's interior?

- Option: Tensions
- Option: Hydrothermal
- Option: Marangoni
- Option: Fragment

6. What describes something that is at a higher level than others?

- Option: Forecasted
- Option: Advanced
- Option: Spectacle
- Option: Propelling

7. What involves two or more people working together towards a shared goal?

- Option: Claims
- Option: Enhance
- Option: Collaboration
- Option: Interpret

8. What term means being the only one of its kind?

- Option: Unique
- Option: Abundant
- Option: Deceptively
- Option: Insights

9. What term describes something made or produced by human beings rather than occurring naturally?

- Option: Propelling
- Option: Artificial
- Option: Tensions
- Option: Fragment

10. What term means producing and discharging a substance such as a hormone from a cell or gland?

- Option: Revolutionize
- Option: Secreting
- Option: Marangoni
- Option: Tensions

Gap-Fill (Fill in the blanks with the correct word from the vocabulary list.)

11. A _____ is a very bright meteor that may be seen even in daylight.

12. The weatherman _____ heavy rain for tomorrow.

13. The movie's soundtrack managed to _____ strong emotions in the audience.
14. The _____ effect is the mass transfer along an interface between two fluids due to surface tension gradient.
