

Company Hacked by North Korean Cyber Criminal Post Hiring Mistake

Description

A recent incident has come to light where a company fell victim to a cyber attack after unknowingly hiring a North Korean hacker as a remote IT worker. The hacker managed to infiltrate the company's network, exfiltrate sensitive data, and then demand a ransom. This firm, based in the UK, US, or Australia, chose to stay anonymous but allowed cyber responders from Secureworks to disclose the incident to raise awareness.

This case is part of a concerning trend where North Korean operatives are masquerading as remote workers in Western companies to bypass sanctions and fund their regime. Companies have been warned about the risks associated with hiring individuals remotely, especially in light of these incidents.

According to Rafe Pilling, the Director of Threat Intelligence at Secureworks, this escalation in fraudulent schemes poses a significant threat to companies. North Korean operatives are no longer just seeking a steady income but are now engaging in data theft and extortion for higher sums.

This incident is not an isolated one, as another North Korean IT worker was recently caught attempting to hack their employer. KnowBe4, a cybersecurity company, managed to detect and disable the hacker's access to their systems promptly.

Employers are advised to exercise caution when hiring remote workers, conduct thorough background checks, and remain vigilant for any suspicious behavior. With the rise of sophisticated cyber attacks, companies must prioritize cybersecurity measures to safeguard their assets and protect against potential threats.

Vocabulary List:

- 1. Infiltrate /'ɪn.fɪl.treɪt/ (verb): To enter or gain access to an organization or system secretly and gradually.
- 2. **Exfiltrate** /'ɛks.fɪl.treɪt/ (verb): To covertly remove data from a computer or network.

Comprehension Questions

Multiple Choice

1. What nationality was the North Korean hacker involved in the cyber attack?

Option: North Korean

Option: Chinese Option: Russian Option: American

2. Which cybersecurity company disclosed the incident involving the North Korean hacker?

Option: Secureworks
Option: KnowBe4
Option: FireEye
Option: CrowdStrike

3. What type of data did the hacker exfiltrate from the company's network?

Option: Sensitive data
Option: Public data

Option: Non-sensitive data Option: Financial data

4. What is the recommendation for employers when hiring remote workers?

Option: Conduct thorough background checks

Option: Skip background checks Option: Hire based on skills alone

Option: Ignore any suspicious behavior

5. Why are North Korean operatives masquerading as remote workers in Western companies?

Option: To bypass sanctions

Option: For leisure

Option: To learn new skills Option: To promote peace

6. What is the primary motivation for North Korean operatives engaging in cyber attacks according to Rafe Pilling?

Option: Data theft and extortion

Option: Ethical hacking

Option: Network security improvement

Option: Software development

True-False

- 7. The company victim to the cyber attack was based in the UK, US, or Australia.
- 8. North Korean IT workers have only been involved in isolated incidents of hacking.
- 9. KnowBe4 successfully prevented a North Korean hacker from accessing their systems.
- 10. Employers are not warned about the risks of hiring remote workers by cybersecurity experts.
- 11. North Korean operatives are now seeking higher sums through data theft and extortion.
- 12. Companies are not advised to prioritize cybersecurity measures against potential threats.

Gap-Fill

13. According to the information provided, North Korean operatives are masquerading as remote workers in
Western companies to bypass
14. Rafe Pilling highlighted that North Korean operatives are no longer seeking just a steady income but are
now engaging in data theft and for higher sums.
15. Employers are advised to exercise caution when hiring remote workers, conduct thorough background
checks, and remain vigilant for any suspicious
16. Companies must prioritize cybersecurity measures to safeguard their assets and protect against
potential
17. The rise of sophisticated cyber attacks has led to a heightened focus on cybersecurity to secure
company

18. KnowBe4 promptly detected and disabled the North Korean hacker's access to their

Answer

Multiple Choice: 1. North Korean 2. Secureworks 3. Sensitive data 4. Conduct thorough background checks

5. To bypass sanctions 6. Data theft and extortion

True-False: 7. True 8. False 9. True 10. False 11. True 12. False

Gap-Fill: 13. sanctions 14. extortion 15. behavior 16. threats 17. assets 18. systems

Vocabulary quizzes

Multiple Choice (Select the Correct answer for each question.) -NEWS.COM

1. What is the primary purpose of an analgesic?

Option: To alleviate pain Option: To induce sleep

Option: To increase heart rate Option: To reduce blood pressure
