

# Discovery in France Reveals Titanosaur Skeleton Dating Back 70 Million Years

## Description

One rainy day in the serene but rugged landscape of Montouliers, France, an unexpected discovery was brought to light through pure serendipity. Stumbling upon a geological curiosity, Damien Boschetto—a passionate paleontologist still in the prime of his youth—unearthed an ancient relic of a bygone era, a nearly intact dinosaur skeleton ranging from the posterior fragments of the skull to the tip of the tail.

His intrepid spirit of exploration urged him to delve into an unusual landscape formed by a recent landslide. Upon scrutinizing the peculiar cliffside, a protruding fragment of an ossified relic became noticeable. This seemingly ordinary trek evolved into a portal to a prehistoric world, as reported first by the French media outlet France Bleu on February 13.

Once the skeletal wonder was extracted from its earthly tomb, the scientific prowess of the French National Center for Scientific Research, in alliance with the Archaeological and Paleontological Cultural Association backed the Cruzy Museum, identified the nearly 10-meter long remains as a Titanosaur. The Titanosaur—an iconic herbivore with a long neck—traditionally held the distinction of being among the largest dinosaurs ever to stomp the earth.

Despite multiple revelations of similar fossils in Europe, the circumstance under which this fossil was discovered made it an exceptional find. Unusually, the bone structure had managed to withstand the ravages of time, thus impeccably preserving its original anatomical arrangement.

However, the plot thickened when an array of additional fossils were also revealed in the same area upon further examination. The captivating constellation of fossils comprised herbivore species such as the Rhabdodon, entities of the carnivorous Theropods family, and amusingly even remnants of prehistoric crocodiles.

Ultimately, all newfound relics found a home in the Cruzy Museum's laboratory, where they await further exploration and analysis. The entirely preserved Titanosaur skeleton, in particular, is envisioned to be a monumental asset that can contribute significantly to the pre-existing knowledge of these magnificent beasts.

Researchers theorize that this extraordinary find could range from 70 to 72 million years old. The Titanosaurs, indeed, roamed the earth during the Jurassic Epoch to the end of the Cretaceous period. This time frame lies around 163.5 million to 66 million years ago.

It's a rare occurrence to stumble upon fossils that maintain their anatomical connectivity when exhumed. The observed connection between these fossils is critical as it suggests their rapid burial post-death before complete decomposition.

As Matthew Carrano, a revered research geologist, and curator of Dinosauria at the Smithsonian Institution National Museum of Natural History, passionately explains, the quality and completeness of this specimen

has the potential to fuel fresh insight into Titanosaur's existence. While in-depth investigation is expected to unveil more subtle details about these paleontological marvels, it is generally agreed this discovery will elevate our collective understanding of this group of dinosaurs.

For the time being, the association, while keeping an eye on the ongoing research, is also preparing to explore this fossil-rich region further. It is acknowledged that this territory is indeed a treasure chest brimming with fossils of dinosaurs and other species of the same era. Consequently, it is hoped that this exploration will pave the way for developing one of the most extensive collections of Upper Cretaceous dinosaurs in France.

The future certainly appears promising with Boschetto and his peers, setting their sights on acquiring funds to establish a large-scale museum. They envisage this development as a means of creating a safe haven for these precious collections while also presenting them to the wider public.

Undeniably, this significant find is another testament to the profound mysteries that our planet continues to closely guard, only revealing them occasionally to those curious and determined enough to unearth them.

---

## Vocabulary List:

1. **Serendipity** // (noun): The occurrence of events by chance in a happy or beneficial way.
2. **Paleontologist** // (noun): A scientist who studies fossils to understand the history of life on Earth.
3. **Herbivore** // (noun): An animal that feeds on plants.
4. **Anatomical** // (adjective): Relating to the structure of an organism.
5. **Prehistoric** // (adjective): Belonging to or existing in a time before written history.
6. **Exhumed** // (verb): To dig up something (especially a dead body) out of the ground.

## Vocabulary quizzes

### Multiple Choice ( Select the Correct answer for each question. )

1. Which word means cheerful and full of energy?

- Option: Ebullient
- Option: Resplendent
- Option: Pedigree
- Option: Captivating

2. Who studies fossils to learn about ancient lifeforms?

- Option: Authenticity
- Option: Paleontologist
- Option: Herbivore

---

Option: Anatomical

3. What term refers to the quality of being trustworthy or dependable?

Option: Prehistoric

Option: Exhumed

Option: Commencement

Option: Reliability

4. Which word describes something that adds extra or additional support?

Option: Anticipation

Option: Forefront

Option: Supplemental

Option: Ostentatiously

5. What is a solid piece of debris from an object such as a comet or asteroid that originates in outer space and survives its fall to Earth called?

Option: Meteorite

Option: Vibration

Option: Seismic

Option: Remnants

6. Which word means to dig out (something buried especially a corpse) from the ground?

Option: Amendments

Option: Serendipity

Option: Paleontologist

Option: Exhumed

7. What word is used to describe something visually impressive or dazzling?

Option: Speculative

Option: Revised

Option: Evaluator

Option: Resplendent

8. Which term is used to describe someone who is capable and skilled in a particular area?

Option: Competent

Option: Spam

Option: Reliability

Option: Amendments

9. If something is based on conjecture rather than knowledge it is considered:

Option: Serendipity

Option: Paleontologist

Option: Speculative

Option: Revised

10. Which word means in a pretentious or showy manner designed to impress?

Option: Extraterrestrial

Option: Concurrent

Option: Supplemental

Option: Ostentatiously

**Gap-Fill ( Fill in the blanks with the correct word from the vocabulary list. )**

11. \_\_\_\_\_ to the contract were made to address the new regulations.
12. Their meeting was pure \_\_\_\_\_ as they both arrived at the same spot unexpectedly.
13. The company is at the \_\_\_\_\_ of technological innovation in the industry.
14. The archaeologists \_\_\_\_\_ the ancient artifacts from the burial site.
15. The manuscript was \_\_\_\_\_ multiple times before it was published.
16. A \_\_\_\_\_ primarily feeds on plants and vegetation.
17. The university \_\_\_\_\_ ceremony will take place next week.
18. The \_\_\_\_\_ of the engine could be felt throughout the ship.
19. The dog came from a long line of champions boasting an impressive \_\_\_\_\_.
20. The artist's performance was so \_\_\_\_\_ that the audience was spellbound.
21. The possibility of \_\_\_\_\_ life forms existing in the universe intrigues scientists.

**Matching Sentences ( Match each definition to the correct word from the vocabulary list. )**

22. The antique shop guarantees the of all items sold.
23. The school board hired an to assess the effectiveness of the new curriculum.
24. The red color featured in the new collection caught everyone's attention.
25. Mark's email filter caught the unsolicited messages before they cluttered his inbox.

26. The region experienced a series of activities that raised concerns among residents.
27. The archaeologists discovered ancient of a long-lost civilization buried beneath the sand.
28. A leader knows how to motivate and guide their team to success.
29. The crowd waited in as the final results of the competition were announced.
30. Investing in volatile markets can be risky due to the nature of returns.
31. The two events are running but in different locations allowing attendees to participate in both.

## Answer

**Multiple Choice:** 1. Ebullient 2. Paleontologist 3. Reliability 4. Supplemental 5. Meteorite 6. Exhumed  
7. Resplendent 8. Competent 9. Speculative 10. Ostentatiously

**Gap-Fill:** 11. Amendments 12. Serendipity 13. Forefront 14. Exhumed 15. Revised 16. Herbivore  
17. Commencement 18. Vibration 19. Pedigree 20. Captivating 21. Extraterrestrial

**Matching sentence:** 1. Authenticity 2. Evaluator 3. Dominantly 4. Spam 5. Seismic 6. Remnants 7. Competent  
8. Anticipation 9. Speculative 10. Concurrent
