

Fish with Evolved Legs: Seeking and Savoring Buried Food

Description

ESL-NEWS.COM

The northern sea robin uses its legs to find food in the seabed

Anik Grearson

A fish in the ocean called the northern sea robin has legs that help it find food in the sand. These legs are like tongues and are used to locate prey hidden in the seabed.

The sea robins have three legs on each side of their body that come out from their fins. These legs used to be part of their fins and have evolved into useful sensory organs.

Scientists from Harvard University studied these fish in the lab. They found that some sea robins were good at finding buried food, while others were better at walking. The different types of sea robins had distinct legs for these purposes.

These legs have special bumps with taste receptors and touch-sensitive neurons. The development of these unique legs is controlled by an ancient gene called tbx3a.

Vocabulary List:

- 1. Evolved /I'voolvd/ (verb): Developed gradually over time especially from a simple to a more complex form.
- 2. Robins /'rob.inz/ (noun): A type of fish known for unique adaptations.
- 3. Sensory /'sɛn.sɔ:r.i/ (adjective): Relating to sensation or to the physical senses; transmitted or perceived by the senses.
- 4. Receptors /rɪ'sɛptərz/ (noun): Specialized cells or proteins that receive and respond to sensory stimuli.
- 5. **Neurons** /'njʊərəʊnz/ (noun): Nerve cells that transmit impulses and process information in the nervous system.
- 6. Prey /preɪ/ (noun): An animal that is hunted and eaten by another.

Comprehension Questions

Multiple Choice

- 1. What is the function of the legs of the northern sea robin?
 - Option: To help it swim faster
 - Option: To find food in the sand
 - Option: To communicate with other fish
 - Option: To protect itself from predators

2. How many legs does the northern sea robin have on each side of its body?

Option: One Option: Two Option: Three Option: Four

3. What have the evolved legs of the sea robins turned into?

Option: Eyes Option: Wings Option: Sensory organs Option: Teeth

4. What did scientists from Harvard University study in the lab?

Option: Birds Option: Insects Option: Fish Option: Mammals

5. What do the special bumps on the legs of sea robins have?

Option: Ears Option: Taste receptors and touch-sensitive neurons Option: Gills Option: Teeth

6. Which gene controls the development of the unique legs of the northern sea robin?

Option: tbx3a Option: DNA Option: RNA Option: ATP

Answer

Multiple Choice: 1. To find food in the sand 2. Three 3. Sensory organs 4. Fish 5. Taste receptors and touch-sensitive neurons 6. tbx3a

Vocabulary quizzes

Multiple Choice (Select the Correct answer for each question.)

1. Which medication is commonly used to treat epilepsy?

Option: Sodium valproate Option: Ibuprofen Option: Amoxicillin Option: Aspirin

- 2. What prefix is commonly used to refer to things related to the internet or technology?
 - Option: Cyber Option: Geo Option: Bio Option: Aero
- 3. Which term refers to measures taken to ensure safety and protection?
 - Option: Security Option: Hospitality Option: Flexibility Option: Transparency
- 4. What are preserved remains or traces of ancient organisms called?
 - Option: Fossils Option: Crystals Option: Artifacts Option: Inventions
- 5. What are the cells that transmit information in the nervous system?
 - Option: Neurons Option: Platelets Option: Fibroblasts Option: Tendons
- 6. What term is used to describe an animal that is hunted and eaten by another?
 - Option: Prey Option: Predator Option: Herbivore Option: Omnivore
- 7. What process converts information into a code to prevent unauthorized access?

Option: Encryption Option: Decryption Option: Transcription

Option: Translation

8. Which branch of science studies the structure of organisms and their parts?

Option: Anatomy Option: Ecology Option: Botany Option: Astronomy

9. Which birds are known for their red breasts?

Option: Robins Option: Crows Option: Eagles Option: Sparrows

10. What characteristic refers to the ability to walk on two legs?

Option: Bipedality Option: Quadrupedality Option: Flight Option: Swimming

Gap-Fill (Fill in the blanks with the correct word from the vocabulary list.)

 11. The company issued a product _______ due to safety concerns.

 12. She was _______ to succeed in her career despite facing challenges.

 13. The documentary _______ the harsh realities of the industry.

 14. The new system proved to be more _______ than the old one.

 15. The decision to close the factory was highly _______ among the employees.

 16. The student was _______ for cheating on the exam.

 17. She was deeply _______ in the local community activities.

 18. The trade embargo was officially _______ by the government.

 19. Smoking has been proven to have ________ effects on health.

 20. The painting was a beautiful landscape _______ a scene from the countryside.

Matching Sentences (Match each definition to the correct word from the vocabulary list.)

21. The of a new species in the rainforest excited the scientific community.

22. The system allows us to experience the world through touch taste and smell.

23. Despite his success he remained humble and in his values.

24. The new manufacturing process was more and cost-effective.

25. Over time humans into the dominant species on the planet.

26. The product was recalled due to manufacturing that could pose a safety risk.

27. Customer is important for improving products and services.

28. Individuals have the right to protect their and personal information.

29. is a neurological disorder characterized by recurrent seizures.

30. Scientific is essential for advancing medical knowledge and treatments.

Answer

Multiple Choice: 1. Sodium valproate 2. Cyber 3. Security 4. Fossils 5. Neurons 6. Prey 7. Encryption 8. Anatomy 9. Robins 10. Bipedality

Gap-Fill: 11. recall 12. determined 13. exposed 14. efficient 15. controversial 16. punished 17. involved 18. sanctioned 19. harmful 20. resembling

Matching sentence: 1. discovery 2. sensory 3. grounded 4. efficient 5. evolved 6. defects 7. feedback 8. privacy 9. Epilepsy 10. research
