

Fox with Rabies Bites Woman Unloading Groceries in Atmore, According to NorthEscambia.com

Description

The Alabama Department of Public Health issued a public warning after a woman was bitten by a rabid fox in Atmore. The incident occurred when the woman, who was unloading her groceries, was attacked by the fox. The fox was later confirmed to have rabies, a viral disease that can be fatal if left untreated.

State Public Health veterinarian Dr. Dee W. Jones emphasized the importance of vaccinating pets against rabies, as it not only protects the animals but also their owners and caretakers. Alabama state law mandates that dogs, cats, and ferrets over 12 weeks old be current with their rabies vaccinations.

To prevent exposures to rabies, residents are advised to keep their pets confined within fenced areas, avoid leaving pet food outside, and refrain from interacting with wildlife or domestic animals behaving strangely. Children should also be cautioned against approaching stray or wild animals.

This incident serves as a reminder of the ongoing risks posed by rabies and the importance of taking necessary precautions to protect against this potentially deadly disease.

Vocabulary List:

1. **Rabies** /'reɪ.biːz/ (noun): A viral disease that affects the central nervous system and is usually transmitted through animal bites.
2. **Vaccinating** /'væk.sɪ.neɪ.tɪŋ/ (verb): Administering a vaccine to produce immunity against a disease.
3. **Confined** /kən'faɪnd/ (adjective): Restrained or limited within certain boundaries.
4. **Exposures** /ɪk'spoʊ.ʒərz/ (noun): The condition of being subjected to risk or danger.
5. **Caretakers** /'keɪ.teɪ.kərz/ (noun): Individuals who take care of someone or something.
6. **Cautioned** /'kɔː.ʃəned/ (verb): Advised or warned someone about potential dangers.

Comprehension Questions

Multiple Choice
