

Golden Retriever Struggles to Stay Awake During Flight

Description

Airplane cabins often struggle to provide comfort, with limited space and constant noise. Despite this, Merlot, a Golden Retriever, has gained attention for his calm presence while flying. His relaxed demeanor highlights a different side of air travel, providing a pleasant distraction for many.

In a recent video shared online, Merlot demonstrates exceptional behaviour during a flight. Nestled in the footwell of an aisle seat, he rests his head on his owner's leg, appearing almost asleep. This scene contrasts with the common experience of anxious pets, as Merlot embodies serenity. His owners suggest that the hustle and bustle of the cabin no longer phase him.

The video reveals his habitual nature on flights. After briefly checking in with his owner, he drifts back to sleep. Observers note this is not his first flying experience; he has shown interest in safety demonstrations on previous trips, even travelling in business class. This latest flight, however, is purely a time for rest.

The dog's owner describes him as "quiet, trained, and asleep," illustrating how well Golden Retrievers can behave during air travel. These dogs thrive on companionship, often preferring to be close to their humans, even at cruising altitude. The post showcasing Merlot received over 2,600 likes, with many viewers expressing their desire to sit next to him or suggesting that all pets belong in the cabin.

Overall, Merlot's journey showcases the potential for calmness in air travel for pets. His owner and supporters view him as a "perfect angel," enjoying the ride without any signs of stress.

Vocabulary quizzes

Multiple Choice (Select the Correct answer for each question.)

-
1. What term refers to the presence of a harmful substance in the environment?
Option: Infection
Option: Contamination
Option: Pollution
Option: Sanitation
 2. Which process is essential for maintaining air quality in a closed environment?
Option: Isolation
Option: Filtration
Option: Ventilation
Option: Contamination
 3. What is the term for the spread of a disease or infection from one person to another?
Option: Reception
Option: Transmission
Option: Conduction
Option: Reflection
 4. Which type of treatment aims to alleviate symptoms or cure a disease?
Option: Preventative
Option: Therapeutic
Option: Diagnostic
Option: Prophylactic
 5. What process involves the progressive loss of structure or function in neurons?
Option: Neuroinflammation
Option: Neurogenesis
Option: Neurodegeneration
Option: Neuroplasticity
 6. What process confirms that research findings are accurate and reliable?
Option: Experimentation
Option: Validation
Option: Hypothesis
Option: Observation
 7. What term refers to tiny particles or droplets suspended in the air?
Option: Solvent
Option: Aerosol
Option: Mist
Option: Vapor

8. What term describes the rapid increase in numbers especially of cells or organisms?

- Option: Diminishing
- Option: Proliferating
- Option: Declining
- Option: Ceasing

9. What is the body's response to injury or infection called?

- Option: Hemostasis
- Option: Inflammation
- Option: Regeneration
- Option: Debridement

10. What process is used to separate solids from liquids or gases using a filter?

- Option: Circulation
- Option: Filtration
- Option: Evaporation
- Option: Distillation

Gap-Fill (Fill in the blanks with the correct word from the vocabulary list.)

11. The yoga retreat offered a sense of _____ to its participants.

12. _____ is a highly toxic chemical compound that can be fatal.

13. Many plastics are made from long chains of _____ .
