

Helldivers 2 Forces Players to Choose Between Two New Stratagems by Bullying Them

Description

Arrowhead Game Studios has set a challenging new task for the Helldivers 2 community. Players must now choose between liberating two different planets, with each choice unlocking a unique stratagem for the community. The planet that is liberated first will determine which stratagem is salvageable for players. If Choohee is liberated first, players will gain access to the MD-17 Anti-Tank Mines, while liberating Penta first will reward players with the RL-77 Airburst Rocket Launcher.

Discussions among players are heating up as they debate the merits of each weapon. The rocket launcher is seen as an effective anti-air weapon, while the mines are favored for taking out heavily armored ground units. With the clock ticking on the major order, players have the opportunity to test out both stratagems on each planet before making their decision.

Players are encouraged to choose wisely and make an informed decision before taking on this challenging mission. As the community comes together to tackle this new task, the outcome remains to be seen.

Vocabulary List:

1. **Challenging** // (adjective): Presenting difficulties hard to do or accomplish.
