

# Helldivers 2 Launches Advanced Warbond with Addition of New Weapons, Equipment and Armor

## Description

Helldivers 2, a popular PC and PlayStation 5 co-op shooter game, has recently launched its new Cutting Edge premium Warbond which is now available live. This **Warbond** brings in numerous additional items including weapons, gear, and armor. The Warbond marks Helldivers 2's own unique version of the typical battle pass found in many games. One impressive aspect of this Warbond is its absence of a time limit, providing gamers the ability to unlock its rewards with liberty and unlimited access once purchased.

The cost of Cutting Edge is 1,000 Super Credits. These credits can be accumulated from gameplay itself or bought with real currency. In terms of real currency, 1,000 Super Credits round up to \$9.99.

The Warbond features the EX Series Prototypes and an **expanded arsenal** which includes varieties of laser rifles and shotguns. The arsenal also offers the option to unlock new stun grenades providing players with a wider range of gear to suit their combat style.

Apart from weapons and gear, the Warbond also includes cosmetic items like unique capes with matching player cards. New emotes are also available for players to express themselves during gameplay. One specific feature of the Cutting Edge is the Localisation Confusion booster. This **\*\*booster\*\*** tends to slow down the frequency of enemy encounters, giving players more breathing time.

It's an exciting time for Helldivers 2 fans, with the developer, Arrowhead, actively enhancing the game with new features. It aims to focus on **community engagement**, seeking players' help in brainstorming and implementing creative solutions for game development challenges.

Helldivers 2, since its launch in February 2024, has been a surprising success, reportedly standing at the top of Steam charts and selling approximately three million copies. **Analysts** believe that the game's popularity is still on the rise. For a deeper dive into why Helldivers 2 is so well-received, take a moment to read IGN's review of Helldivers 2.

**Warbond:** A term often used in gaming to refer to certain special packages or passes that players can buy to gain additional features or items in the game.

**Expanded Arsenal:** Refers to a broader range of weapons or equipment available to a player in a game.

**Booster:** In gaming, a booster is generally an item or feature that enhances gameplay by providing unique abilities, bonuses or advantages to players.

**Community Engagement:** Refers to the active involvement of players or members in contributing ideas and participating in discussions related to the game's development and improvement.

**Analyst:** A professional who conducts analysis. In the context of gaming, this could refer to a person who studies game popularity, sales, trends, and user behavior to assess a game's performance and future potential.
