

# Historic Satellite Video Call from Welsh Mountain

## Description

A man holding a phone in West Wales with mountains and a river.  
Vodafone

Vodafone has made a video call using a satellite phone. This is the first time in the UK. The call was from a mountain in Wales.

Vodafone wants to add satellite connections to its phone service by the end of this year. This will help areas without mobile signals.

But, experts say many satellites need to be launched for this to work well.

There is a problem. Astronomers say too many satellites make it hard to watch space. They see bright lines in their images.

They worry it will be harder to find dangerous asteroids that can hit Earth.

## Vocabulary List:

1. **Satellite** /'sæt.əl.aɪt/ (noun): An object that orbits a larger body such as a planet or moon often used for communication.
