Leaker hints at Resident Evil 9 being unveiled soon with a possible release in the upcoming year

Description

Resident Evil 9 is rumored to be revealed soon and released next year, according to horror leaker Dusk Golem. The game is said to have been in development for about seven years and could potentially be announced as early as January. While Dusk Golem has been accurate with previous leaks, their track record is not perfect, so this information should be taken with caution.

Fans are speculating that an announcement for Resident Evil 9 may come during a rumored PlayStation showcase, following the pattern of previous game announcements. If confirmed, Resident Evil 9 will join a lineup of highly anticipated titles expected to be released next year, such as Death Stranding 2, Ghost of Tsushima 2, and GTA 6.

Shinji Mikami, the creator of the Resident Evil series, recently made headlines by leaving Tango Gameworks to explore new genres outside of survival horror. With excitement building for the next installment in the iconic franchise, fans are eagerly awaiting official confirmation of Resident Evil 9's release.
