

Major Discounts on M3 MacBook Air: 13-inch \$149 Off, 15-inch 16GB \$249 Off!

Description

Update: Amazon is currently offering the 15-inch M2 MacBook Air with a 512GB SSD for a discount of \$299, bringing the price down to \$1,199.99 from the regular \$1,499. You can find the 13-inch M2 models for \$799 and all the discounted M3 models at the lowest prices ever.

During Prime Day 2024, the Apple M3 MacBook Air was discounted by \$150, and now various configurations are back starting from \$850. One of the popular configurations is the 13-inch variant with 16GB of RAM and a 512GB internal SSD, now priced at \$1,249.98 on Amazon. This deal represents a \$149 discount from the regular price of \$1,499.

The price drops also apply to the 15-inch models, with the entry-level configuration priced at \$1,049.98 for the 8GB RAM and 256GB SSD version, and \$1,449.98 for the 16GB model.

While the 13-inch deals are close to the Prime Day all-time lows, the 15-inch options are currently at their lowest prices ever on Amazon.

Apple's lineup is expected to be refreshed starting next month, with updates to the entry-level AirPods, MacBook Pro, and possibly the iPad mini. However, the M3 MacBook Air is still a relatively new machine that is likely to remain relevant for some time.

- 13-inch MacBook Air M2 8GB/256GB - \$799 (Reg. \$999)
- 13-inch MacBook Air M3 8GB/256GB - \$850 (Reg. \$1,099)
