

Monster Hunter: World's Physical and Digital Distribution Exceeds 25 Million Units

Description

Capcom, the highly recognized Japanese video game developer, has officially disclosed that their revered game, *Monster Hunter: World* along with its accompanying *Monster Hunter World: Iceborne Master Edition*, have collectively surpassed an impressive 25 million in combined shipments and digital sales worldwide. This striking number encapsulates the global enthusiasm shown towards this prominent game that initially made its debut on the PlayStation 4 and Xbox One platforms back on 26th January 2018, and subsequently on personal computers through the renowned digital distribution platform, Steam, on 3rd August 2018.

The allure of *Monster Hunter: World* didn't cease with its initial release; a captivating expansion, headline as *Monster Hunter World: Iceborne*, was subsequently launched for PlayStation 4 and Xbox One on 6th September 2019, and it extended its reach to personal computers via Steam on 9th January 2020.

With an emblematic two-decade-long journey that will culminate in March 2024, the *Monster Hunter* series finds itself nestled comfortably in the hunting action games genre. What sets these games apart is the feisty competition set up between their characters and titanic creatures, all staged in stunningly picturesque natural landscapes. Since its genesis with the first game released in 2004, *Monster Hunter* has cemented itself as an innovative entry in multiplayer gaming, where comrades band together to take down daunting beasts. This novel concept quickly bloomed into a worldwide sensation, accounting for jaw-dropping 97 million units sold up until the end of 2023.

Monster Hunter: World was instrumental in propelling the *Monster Hunter* series to a global brand phenomenon. Capcom went the extra mile in ensuring - for the first time in the series' history - a simultaneous worldwide launch paired with colossal international promotional tactics. These strategic moves paid off handsomely as the game earned the coveted title of Capcom's best-selling game ever, astonishingly, within just one month of its release. In the six years post-launch, Capcom kept fuelling the game's popularity by pushing digital sales, enabling *Monster Hunter: World* to clock a record-breaking company milestone with 25 million total units sold.

On the heels of this triumphant run, December of the preceding year saw Capcom unveil *Monster Hunter Wilds*, the latest entrant in the *Monster Hunter* lineup, set to be released in 2025. This announcement has fetched considerable interest in the gaming community, pointing to continued success for the series.

As evidenced by their steady stream of engaging releases and solid sales figures, Capcom reaffirms its unceasing dedication to meeting user expectations. Harnessing their industry-leading game development capabilities, their resolution is to fabricate highly engaging gameplay experiences.
