

Mutants and Mutagen in Magic: The Gathering Gameplay

Description

In the world of *Magic: The Gathering*, a new set featuring the *Teenage Mutant Ninja Turtles* focuses on the combination of green and blue. These colours represent mutants and their strange transformations. The *Teenage Mutant Ninja Turtles* universe includes many unique mutant characters, like frogs and fish, which align with the themes of green and blue in *Magic*.

One character highlighted is Genghis Frog, the leader of the Punk Frogs. He can transform other creatures into 3/3 creatures when he attacks. Initially, developers considered a complex mechanic called "mutate." However, they decided it was too complicated for this set. Instead, they looked for a simpler method to show how mutagen—the chemical that creates mutants—affects creatures.

Developers created Mutagen tokens, which allow players to add +1/+1 counters to creatures. This change simplified gameplay while fitting the *Teenage Mutant Ninja Turtles* theme. Another character, Mutagen Man, creates Mutagen tokens himself, which fits his character's story.

Venus, another character from the *Teenage Mutant Ninja Turtles*, also has a unique ability related to counters. As the set evolves, the focus remains on mutant growth and change, illustrating the colourful history and creativity of the *Teenage Mutant Ninja Turtles* world. The new set releases on March 6, 2026, and preorders are now available.
