While sleep is undoubtedly pivotal for one's overall well-being, recent research underscores its crucial role in potentially mitigating dementia risk as well. This insight emerges from a November 2024 study published in the journal <u>Neurology</u>. Although an individual's <u>dementia</u> risk is influenced by myriad <u>factors</u>, understanding the link with sleep is a step forward.

Expert Opinions: Renowned neurologists such as <u>W. Christopher Winter</u> and <u>Verna Porter</u> explain that excessive daytime sleepiness could be indicative of motoric cognitive risk syndrome (MCR), a precursor to dementia. Intriguingly, the study reveals that 35% of those with pronounced daytime sleepiness developed MCR, compared to only 6.7% without such sleepiness.

MCR consists of symptoms like slowed walking and cognitive complaints, potentially heralding dementia. It's crucial to note that while natural tiredness is a part and parcel of aging, ebbing enthusiasm and excessive sleepiness, such as dozing off during meals or social occasions, are concerning.

The study further cements the bond between quality sleep and reduced dementia risk. <u>Winter</u> notes that the brain's glymphatic system, which clears waste, functions optimally during sound sleep. Thus, lack of sleep inhibits this restorative process.

While the exact recipe to stave off dementia remains elusive, practices such as physical activity, managing chronic conditions, and steering clear of smoking are suggested by the <u>CDC</u>. Furthermore, scheduling naps might offer benefits, complementing a regular sleep pattern.

Ultimately, achieving a restful night's sleep is paramount. Measures such as maintaining a consistent sleep schedule, moderating caffeine intake, and creating a serene sleep environment can significantly boost sleep quality. For persisting issues, consulting a healthcare professional is advisable.

Vocabulary List:

- 1. Mitigating /'miti,geitin/ (verb): Making less severe or serious; alleviating.
- 2. Neurology /njʊˈrɒlədʒi/ (noun): The branch of medicine dealing with disorders of the nervous system.
- 3. **Cognitive** /'kpgnrtrv/ (adjective): Relating to the mental processes of perception memory judgment and reasoning.
- 4. Excessive /Ik'sɛsɪv/ (adjective): More than is necessary normal or desirable; immoderate.
- 5. **Precursor** /prɪˈkɜːrsər/ (noun): Something that comes before another of the same kind; a forerunner or predecessor.
- 6. **Serene** /səˈriːn/ (adjective): Calm peaceful and untroubled; tranquil.

Comprehension Questions

Multiple Choice

1. What is the crucial role of sleep in potentially mitigating dementia risk according to recent research?

Option: Enhancing memory retention
Option: Boosting immune function
Option: Clearing waste from the brain
Option: Improving cardiovascular health

2. Which renowned neurologists link excessive daytime sleepiness to the precursor of dementia known as motoric cognitive risk syndrome (MCR)?

Option: W. Christopher Winter

Option: Verna Porter

Option: Both W. Christopher Winter and Verna Porter

Option: None of the above

3. What percentage of individuals with pronounced daytime sleepiness developed MCR according to the study mentioned?

Option: 6.7% Option: 15% Option: 25% Option: 35%

4. What is emphasized as a potential symptom of motoric cognitive risk syndrome (MCR) heralding dementia?

Option: Increased energy levels

Option: Slowed walking

Option: Improved cognitive function
Option: Enhanced coordination

5. According to the content, what activity is suggested to potentially complement a regular sleep pattern in reducing dementia risk?

Option: Regular coffee consumption

Option: Scheduling naps
Option: Excessive socializing
Option: Irregular sleep patterns

6. What is recommended by the CDC to help prevent dementia?

Option: Avoiding physical activity

Option: Smoking cessation

Option: Increased caffeine consumption

Option: Irregular sleep schedule

True-False

- 7. Excessive daytime sleepiness is not linked to motoric cognitive risk syndrome (MCR) and dementia.
- 8. Maintaining a consistent sleep schedule has no impact on sleep quality.
- 9. Scheduling naps might offer benefits in reducing dementia risk.
- 10. Ebbing enthusiasm and excessive sleepiness are not concerning signs related to aging.
- 11. Physical activity is not recommended by experts to help prevent dementia.
- 12. Lack of sleep does not inhibit the brain's waste-clearing process.

Gap-Fill

| 13. The study mentioned in the content reveals that 35% of | individuals with pronounced daytime sleepiness |
|---|---|
| developed MCR, compared to only | without such sleepiness. |
| 14. Maintaining a consistent sleep schedule, moderating car | feine intake, and creating a serene sleep |
| environment can significantly boost sleep | |
| 15. The exact recipe to stave off dementia remains | , according to the content. |
| 16. Excessive daytime sleepiness could be indicative of mot | oric cognitive risk syndrome (MCR), a precursor |
| to | |

| 17. While natural tiredness is a part and parcel of aging, ebbing enthusiasm and excessive sle | epiness are |
|--|-------------|

| 18. Consulting a healthcare professional is advisable for persisting | related to |
| sleep. | |

Answer

Multiple Choice: 1. Clearing waste from the brain 2. Both W. Christopher Winter and Verna Porter 3. 35%

4. Slowed walking 5. Scheduling naps 6. Smoking cessation

True-False: 7. False 8. False 9. True 10. False 11. False 12. False

Gap-Fill: 13. 6.7% 14. quality 15. elusive 16. dementia 17. concerning 18. issues

Vocabulary quizzes

Multiple Choice (Select the Correct answer for each question.)

1. What does the term "mandate" refer to?

Option: A. A formal order or commission to do something.

Option: B. A type of tropical fruit. Option: C. A musical instrument. Option: D. A scientific theory.

2. What can cause sudden increases in the number of cases of a specific disease?

Option: A. Outbreaks Option: B. Endemics Option: C. Vaccines Option: D. Quarantines

3. Which of the following helps maintain a healthy balance of gut bacteria?

Option: A. Probiotics Option: B. Antibiotics Option: C. Analgesics Option: D. Antihistamines

4. What term refers to the monitoring of behavior activities or other changing information for the purpose

of influencing managing directing or protecting?

Option: A. Surveillance Option: B. Interference Option: C. Censorship Option: D. Repression

5. How is a pathogen spread from one host to another?

Option: A. Transmission Option: B. Creation Option: C. Isolation Option: D. Absorption

6. Which branch of medicine deals with disorders of the nervous system?

Option: A. Neurology Option: B. Gynecology Option: C. Dermatology Option: D. Radiology

NEWS.COM 7. Which term describes a peaceful and calm environment?

Option: A. Serene Option: B. Chaotic Option: C. Dynamic Option: D. Energetic

8. What medical condition is characterized by high blood pressure?

Option: A. Hypertension Option: B. Hypotension Option: C. Hyperthermia Option: D. Hypoglycemia

9. What is the process of removing moisture from something?

Option: A. Desiccation Option: B. Hydration Option: C. Evaporation Option: D. Sublimation

10. What term is used for a magical or medicinal potion?

Option: A. Elixir Option: B. Poison Option: C. Concoction Option: D. Tonic

Gap-Fill (Fill in the blanks with the correct word from the vocabulary list.)

| 11. It is important to | monitor the situation to prevent any security breaches. |
|--|---|
| 12. The illness was caused by the parasite known | own as |
| 13. Doctors identified harmful | in the patient's blood sample. |
| 14. The teacher warned the students not to co | onsume amounts of sugar. |
| 15. High levels of pollution are a | to respiratory problems. |
| 16. Aquatic organisms have adapted to surviv | e in varying levels of in the water. |
| 17. Her remarkable | allowed her to recover quickly from setbacks. |
| 18. Processed foods often contain high levels | of |
| 19. While on vacation she enjoyed | in delicious local cuisine. |
| 20. The increase in COVID-19 cases led to a ri | se in in the region. |
| Matching Sentences (Match each defini- | tion to the correct word from the vocabulary list.) |
| 21. The rapid spread of the virus was to hea | the officials |
| | |
| 22. The government decided to implement a | |
| 22. The government decided to implement a 23. Planting trees is a way of the effects of o | an to control the escalating crime rates. |
| | an to control the escalating crime rates. |
