# Pokémon FireRed and LeafGreen on Switch Fixes Legendary Beast Glitch

## Description

Nintendo brought back the Game Boy Advance games Pokémon FireRed and LeafGreen to the Switch last week. This is important because these classic games have some new features that can change how players enjoy them.

One change is that players can now catch legendary Pokémon without worrying about a problem called the roar glitch. This glitch made it impossible to find certain Pokémon again during the same game. Reports from players show that this issue is not in the Switch versions of the games.

In the old Game Boy Advance versions, two legendary Pokémon, Entei and Raikou, used a move called "Roar" if trapped. This move caused players to miss catching these Pokémon for the rest of their playthrough. Now, catching them on the Switch should be easier. The legendary Pokémon you can find depends on your starting Pokémon. For example, if you choose Squirtle, you will see Raikou.

Another change is that players will now receive special tickets called the Mystic Ticket and Aurora Ticket after finishing the game. In the past, players could only get these tickets through special events.
