Remove Windows 11's Bloatware and Ads for Free

Description

Setting up a new PC with Windows can be hard. Many users find it too difficult and switch to Linux, which is simpler. They look for an easier way to remove extra software on Windows. There is a tool that can help.

Winhance is a free app. It is open-source, which means anyone can use and change it. You can download it from websites like GitHub. Winhance makes it easy to remove unwanted programs and set up your PC.

To use Winhance, first download and install it. When you open it for the first time, it will check your PC's settings. The main screen shows all the apps that come with Windows. You can choose which apps to uninstall by checking their boxes and then clicking "Remove Selected Items." This process is straightforward.

You can also manage external software with Winhance. Click on the "External Software" tab to see programs not from Windows. You can install or uninstall these apps easily too.

Winhance also helps you change settings to improve your PC. You can manage security, ads, and more in one place. There is even a way to change the look of Windows, such as switching to Dark mode. Winhance makes it easier to control and customize your PC.
