

Spain's Oldest Woman, 111, Credits Longevity to Daily Drink

Description

An exciting new technology, ChatGPT, is changing how we interact with computers. ChatGPT is a computer program created by the company OpenAI. It is designed to understand and respond to human language in a way that feels natural and conversational. This technology can be used for many purposes, such as helping people find information, write texts, or even learn new languages.

ChatGPT works by using a form of artificial intelligence, or AI for short. AI is a way that computers can learn from lots of information and then make decisions or give answers based on that learning. For example, if you ask ChatGPT a question about the weather, it can use information from the internet to give you an answer quickly.

One of the reasons ChatGPT is special is because it can understand not just simple commands but also more complex requests in sentences. This makes it very useful for students, teachers, businesses, and more. People can use it to brainstorm ideas, do research, or even have casual conversations.

However, there are some concerns about using ChatGPT. Some people worry that it might replace human jobs, such as customer service roles or writing positions. Others are concerned about privacy because ChatGPT needs access to a lot of data to work well.

Despite these concerns, many experts believe that ChatGPT and similar technologies offer more advantages. They think it can make our lives easier and open up new opportunities for learning and working. As more people start using ChatGPT, we will see how it affects our daily lives and the ways we communicate.

Vocabulary List:

1. **Technology** /tɛk'nɒlədʒi/ (noun): The application of scientific knowledge for practical purposes.
2. **Artificial** /,ɑ:rtɪ'fɪʃəl/ (adjective): Made or produced by human beings rather than occurring naturally.

Comprehension Questions

Multiple Choice

1. What company created the computer program ChatGPT?
Option: IBM
Option: Microsoft
Option: OpenAI
Option: Google
2. Which of the following is NOT a potential use of ChatGPT?
Option: Finding information
Option: Writing texts
Option: Cooking meals
Option: Learning new languages
3. What is one major advantage of ChatGPT according to the text?
Option: It causes unemployment
Option: It enhances privacy
Option: It can understand complex sentences
Option: It generates random responses
4. What type of intelligence is used by ChatGPT?
Option: BI (Biological Intelligence)
Option: CI (Corporate Intelligence)
Option: AI (Artificial Intelligence)
Option: DI (Digital Intelligence)
5. What is one concern mentioned in the text about using ChatGPT?
Option: It increases job opportunities
Option: It improves data security
Option: It might replace human jobs
Option: It doesn't require data access
6. According to experts, what do they believe about ChatGPT and similar technologies?
Option: They will hinder progress
Option: They offer more disadvantages than advantages
Option: They make lives easier and open up new opportunities
Option: They have no effect on daily lives

True-False

7. ChatGPT is designed to respond to human language in a natural and conversational way.
8. Some people worry that ChatGPT might enhance job opportunities.
9. Experts believe that ChatGPT will have minimal impact on daily lives.
10. ChatGPT operates without AI (Artificial Intelligence).
11. ChatGPT can only understand simple commands.
12. The main concern about using ChatGPT is related to data privacy.

Gap-Fill

13. ChatGPT is a computer program created by the company _____.
14. ChatGPT works by using a form of _____ intelligence.
15. One of the reasons ChatGPT is special is because it can understand not just simple commands but also more _____ requests in sentences.
16. Some people worry that ChatGPT might replace human _____.
17. Despite concerns, many experts believe that ChatGPT can make our lives easier and open up new opportunities for _____ and working.
18. ChatGPT needs access to a lot of data to work _____.

Answer

Multiple Choice: 1. OpenAI 2. Cooking meals 3. It can understand complex sentences 4. AI (Artificial Intelligence) 5. It might replace human jobs 6. They make lives easier and open up new opportunities

True-False: 7. True 8. False 9. False 10. False 11. False 12. True

Gap-Fill: 13. OpenAI 14. artificial 15. complex 16. jobs 17. learning 18. well

Vocabulary quizzes

Multiple Choice (Select the Correct answer for each question.)

1. Which word describes the overall feeling or mood of a place?
Option: Atmosphere
Option: Support
Option: Health
Option: Nature
2. What is a synonym for being eager and excited?
Option: Crafts
Option: Enthusiastic
Option: Modern
Option: Album
3. Which term refers to handmade products or artistic work?
Option: Festive
Option: Transportation
Option: Crafts
Option: Environmentally
4. What is the word that describes the application of scientific knowledge for practical purposes?
Option: Support
Option: Technology
Option: Complex
Option: Interact
5. Which term relates to well-being and the absence of illness?
Option: Nature
Option: Happier
Option: Health
Option: Outdoor
6. Which word relates to activities or environments that occur outside?
Option: Artificial
Option: Outdoor
Option: Access
Option: Congestion
7. Which term describes something current or up-to-date?

- Option: Classic
- Option: Featuring
- Option: Modern
- Option: Perform

8. What is used to describe something of a high quality that remains stylish over time?

- Option: Environmentally
- Option: Album
- Option: Classic
- Option: Invest

9. Which term refers to executing a task or putting on a show?

- Option: Technology
- Option: Album
- Option: Excited
- Option: Perform

10. What describes a feeling of great enthusiasm and eagerness?

- Option: Support
- Option: Artificial
- Option: Excited
- Option: Opportunities

Gap-Fill (Fill in the blanks with the correct word from the vocabulary list.)

11. The meal served at the party was extremely _____ satisfying everyone present.
