

# The Best Feature of iPadOS 18: File Upgrades

## Description

iPad users were left disappointed at WWDC as the anticipated software upgrade for the advanced M4 iPad Pro did not materialize in 2024. Despite some powerful new cross-platform features like Apple Intelligence and deep customization tools, iPadOS 18 mainly introduced a Calculator app and redesigned tab bars as its key features.

However, one significant addition to the Files app is set to solve a major issue for iPad users. Previously, the app took an iCloud-first approach to file management, which meant files were not always locally accessible. With iPadOS 18, users now have the option to permanently download folders and files, ensuring they remain available even without an internet connection.

This update is particularly beneficial for those who rely on their iPads for work, providing a sense of security knowing that essential files will always be accessible. The ability to keep files downloaded permanently, regardless of network status, is a game-changer for productivity on the iPad.

While this feature was not highlighted during Apple's presentation of iPadOS 18, it is sure to have a significant impact on users' computing experience, especially for those who require dependable access to their files on the go.
