

The Fed Seems to Have Erroneously Implemented Its Significant Rate Cut

Description

The proliferation of robust economic indicators, alongside an economy exhibiting sustained momentum, has prompted scrutiny among experts regarding the Federal Reserve's decision to implement a substantial rate cut.

Having traversed the culmination of the Federal Reserve's unprecedented rate-hiking cycle, the U.S. economy remains buoyant, raising queries about the necessity of September's aggressive rate reduction.

Recent data has invigorated discussions about whether the central bank's significant 50-basis-point cut was warranted:

- September retail sales exhibited a commendable increase of 0.4 percent compared to August.
- Revisions have suggested that consumer expenditure figures were underestimated.
- Notably, weekly applications for <u>unemployment benefits</u> unexpectedly declined, undeterred by the impact of hurricanes and labor strikes.

Analysts at Yardeni Research articulated their perspective succinctly, asserting, "Today's data fortify our belief that the Fed's stance was excessively accommodating during the rate cut on September 18."

In light of the Fed's initial rate reduction, the Yardeni team subsequently elevated their equity forecasts and anticipated a rise in bond yields—predictions that have materialized post-announcement.

Stock markets are consistently achieving record highs, with the yield on the 10-year U.S. Treasury reaching approximately 4.10 percent, a half-percentage point increase since the Fed's intervention. Wall Street appears to be pricing in the anticipation of even lower borrowing costs, which has led analysts to project that stocks will maintain their upward trajectory.

CME data corroborates this optimism, indicating a 90 percent probability of a subsequent 25-basis-point cut on November 7, with a roughly 75 percent likelihood of a similar movement in December.

Adding to the complexity of the Fed's recent maneuverings, the Atlanta Fed's GDPNow model has adjusted its third-quarter GDP projection from 3.2 percent to 3.4 percent. Earlier this month, I revisited this topic with Gene Goldman, Chief Investment Officer at Cetera Investment Management, who contended that the Fed's aggressive action was unwarranted:

"The Fed's rapid rate cuts introduce a significant risk to our currently favorable economic landscape; excessive reductions too quickly may undermine stability," Goldman articulated.

Notably, while economic data appears robust, sentiment among the general populace remains tepid. A recent University of Michigan consumer sentiment survey discovered an unexpected decline, reflecting apprehensions about <u>escalating prices and sustained inflation</u>, which stands in contrast to the encouraging retail sales figures for the same period.

Economist James Knightley from ING observed, "Consumers may harbor doubts regarding the <u>economic forecast</u>, yet they continue to engage in spending. While financial strains are mounting for numerous households, robust consumption patterns among higher-income individuals are mitigating concerns, implying that the Fed will likely proceed with caution regarding future 25-basis-point cuts."

Vocabulary List:

- 1. **Proliferation** /prə,lɪf.ər'eɪ.ʃən/ (noun): The rapid increase or spread of something.
- 2. **Buoyant** /'bɔɪ.ənt/ (adjective): Able to float; cheerful and optimistic.

- 6. Mitigating /ˈmɪt.ɪˌgeɪ.tɪŋ/ (verb): Making something less severe serious or painful.

Comprehension Questions

Multiple Choice

1. What has prompted scrutiny among experts regarding the Federal Reserve's decision?

Option: Robust economic indicators

Option: Sustained momentum in the economy

Option: Both A and B

Option: September retail sales increase

2. What is the approximate yield on the 10-year U.S. Treasury post the Fed's intervention?

Option: 3.50 percent Option: 4.10 percent Option: 4.60 percent Option: 5.20 percent

3. What did Yardeni Research believe about the Fed's stance during the rate cut on September 18?

Option: It was excessively restrictive

Option: It was excessively accommodating

Option: It was well-balanced Option: It was uncertain

4. What was the unexpected outcome related to unemployment benefits despite hurricanes and labor strikes?

Option: Increase in applications Option: No change in applications Option: Decline in applications Option: Unpredictable applications

5. What is the probability of a subsequent 25-basis-point cut on November 7, according to CME data?

Option: 50 percent Option: 75 percent Option: 90 percent Option: 100 percent

IS.COM 6. What adjustment did the Atlanta Fed's GDPNow model make to its third-quarter GDP projection?

Option: Decrease from 3.4 percent to 2.8 percent Option: Increase from 3.2 percent to 3.4 percent

Option: No change in projection

Option: Increase from 2.9 percent to 3.2 percent

True-False

- 7. The U.S. economy is struggling and facing a downturn.
- 8. Analysts at Yardeni Research disagreed with the Fed's actions on September 18.
- 9. The University of Michigan consumer sentiment survey reported an unexpected decline in sentiment.
- 10. Consumer expenditure figures were overestimated according to recent revisions.
- 11. Stock markets are projected to decline in the near future.
- 12. Gene Goldman supported the Fed's aggressive action as warranted.

Gap-Fill

13. The Atlanta Fed's GDPNow model adjusted its third-quarter GDP projection from 3.2 percent to
percent.
