

UK and US Reject Global AI Agreement

Description

At a recent global summit in Paris, the UK and US chose not to sign an international agreement about artificial intelligence (AI). The agreement, signed by many other countries like France, China, and India, promises to develop AI in an "open", "inclusive", and "ethical" way. However, the UK stated that they couldn't sign due to concerns about national security and "global governance". Meanwhile, US Vice President JD Vance expressed worries that too much regulation on AI could hinder its growth. He emphasized the importance of prioritizing policies that support AI development rather than focusing solely on safety.

The agreement signed by 60 countries aims to make AI accessible to all while ensuring its development is transparent, safe, and secure. It also addresses the environmental impact of AI, with experts warning about its increasing energy consumption. Although the UK government agreed with most of the declaration but felt it lacked clarity on global governance and national security issues related to AI. The summit focused on finding a balance between reaping the economic benefits of AI innovation and addressing its potential risks to society and the environment. European leaders highlighted the importance of collaboration and innovation to harness the power of AI for the greater good.

Gap-Fill

17. Experts warned about the increasing _____ of AI and its environmental impact.

Answer

Multiple Choice: 1. National security and global governance 2. JD Vance 3. 60 4. To make AI accessible to all in an open, inclusive, and ethical manner 5. Energy consumption 6. Clarity on global governance and national security issues

True-False: 7. False 8. False 9. False 10. True 11. False 12. True

Gap-Fill: 17. Energy consumption

Vocabulary quizzes

Multiple Choice (Select the Correct answer for each question.)

1. What is the probability of an event happening called?
Option: Risk
Option: Governance
Option: Association
Option: Consumption
2. What are used to indicate a particular condition or feature?
Option: Vulnerabilities

- Option: Markers
- Option: Biodegrade
- Option: Encrypted

3. What is working jointly with others to achieve a common goal?

- Option: Innovation
- Option: Agreement
- Option: Collaboration
- Option: Surveillance

4. What is the introduction of contaminants into the natural environment causing adverse change?

- Option: Pollution
- Option: Aerosols
- Option: Consequences
- Option: Sensistive

5. Which substances are used in aerosol cans for spraying?

- Option: Ethical
- Option: Acceleration
- Option: Aerosols
- Option: Compromise

6. What kind of consequence is the opposite of gain?

- Option: Development
- Option: Loss
- Option: Resistance
- Option: Manipulated

7. In what form can data be secured from unauthorized access?

- Option: Encrypted
- Option: Synthetic
- Option: Celulose
- Option: Gelatin

8. What is the refusal to accept or comply with something?

- Option: Vulnerabilities
- Option: Resistance
- Option: Marked
- Option: Consumption

9. Which term refers to weaknesses that can be exploited by threats?

- Option: Innovation
- Option: Vulnerabilities

Option: Surveillance

Option: Debate

10. What is the act of using something up or eating or drinking?

Option: Consumption

Option: Legitimate

Option: Risk

Option: Association

Gap-Fill (Fill in the blanks with the correct word from the vocabulary list.)
