## Uncovering the Flaws: What's Wrong With Them?

### Description

Mark Hays is the Associate Director for Cryptocurrency and Financial Technology at Demand Progress Education Fund and Americans for Financial Reform Education Fund.

Just before taking office, Donald Trump and his family started a new cryptocurrency called \$TRUMP. This coin quickly became popular, and its price went up a lot. Many people think that Trump's family is now much richer because of this coin. Even Melania Trump has created her own coin. However, Ivanka Trump warned people about a fake coin using her name.

Meme coins, like \$TRUMP, are based on jokes and do not have real value. They often lose their worth very quickly. Many people see meme coins as scams. Buyers of \$TRUMP cannot sue if they lose money; they must go to arbitration instead.

Today's crypto world is risky. If the government does not protect investors, many people may lose their money. The story of \$TRUMP shows how the rich can take advantage of others.
