

Unlocking the Science of Easter Chocolate Taste

Description

With Easter coming soon, you might have seen chocolate Easter eggs at the store. Have you bought any yet?

Do you think Easter chocolate tastes better than regular chocolate? Some people say it does.

When we compared the ingredients in Easter egg chocolate and regular chocolate, we found they are pretty much the same. The difference is more about how we experience the chocolate when we eat it.

What's in them?

We compared Cadbury Dairy Milk Easter egg and Cadbury Dairy Milk chocolate block. They both have similar energy, protein, fat, and sugar content. The egg has slightly more cocoa solids than the block.

Why does Easter chocolate taste different?

Easter chocolate might taste different because of its texture and smell. Texture and smell play a big role in how we enjoy chocolate.

So, whether you prefer Easter chocolate or regular chocolate, enjoy it in moderation and have a happy Easter!

Vocabulary List:

1. **Ingredients** /ɪnˈɡriː.di.ənts/ (noun): The substances that make up a food product.

Answer

Multiple Choice: 1. Chocolate Easter eggs 2. The egg has more cocoa solids 3. Texture and smell 4. Cadbury Dairy Milk Easter egg 5. Enjoy in moderation 6. Texture

True-False: 7. False 8. False 9. True 10. True 11. False 12. False

Gap-Fill: 13. texture 14. cocoa 15. moderation 16. eat 17. happy 18. energy

Vocabulary quizzes

Multiple Choice (Select the Correct answer for each question.)

1. Who is involved in conducting advanced studies?

Option: Geologists

Option: Medical professionals

Option: Engineers

Option: Researchers

2. What are the components that make up a particular substance?

Option: Ingredients

Option: Experiences

Option: Textures

Option: Environment

3. What type of cells have the potential to develop into different cell types in the body?

Option: Streaks

Option: Tissue

Option: Protein

Option: Stem cells

4. What are difficulties or obstacles that need to be overcome?

Option: Welfare

Option: Immunity

Option: Challenges

Option: Neurons

5. What is the main ingredient in chocolate production?

- Option: Amplifying
- Option: Cocoa
- Option: Researchers
- Option: Disorders

6. What medical condition involves the growth of endometrial-like tissue outside the uterus?

- Option: Environment
- Option: Endometriosis
- Option: Stigma
- Option: Disorders

7. Which cells transmit information in the nervous system?

- Option: Cracks
- Option: Texture
- Option: Protein
- Option: Neurons

8. What activity involves the systematic investigation to establish facts or principles?

- Option: Research
- Option: Tissue
- Option: Protein
- Option: Environment

9. What are small chunks of valuable information or insights?

- Option: Influence
- Option: Nuggets
- Option: Signals
- Option: Disorders

10. What is the practice of avoiding extremes?

- Option: Amplifying
- Option: Moderation
- Option: Stigma
- Option: Ingredients

Gap-Fill (Fill in the blanks with the correct word from the vocabulary list.)

11. _____ plays a vital role in advancing knowledge and understanding in various fields.

12. People with mental health issues often face social _____.

13. Cells are organized into organs and _____ in the body.
14. Dietary sources of _____ are essential for muscle building and repair.
