How to Use Progesterone

Before you try progesterone, it's good to know it's not a quick fix. Following a healthy diet is important for it to work well. My new book, "Your Guide to Cellular Health," explains this in detail.

To balance excess estrogen, you can use progesterone on your gums. It's a natural way to help. Progesterone, along with a few other hormones, can benefit many adults.

It's best to apply progesterone to your gums, not on your skin. This way, your body can use it better. Be careful with the type of vitamin E you use along with progesterone.

You can buy progesterone online for about \$40. Make sure to measure the right dose, usually 25-50 mg. Take it before bed for better sleep.

If you're a woman, take progesterone during the last half of your cycle. Men and women who don't menstruate can take it daily for four to six months.

Consult a doctor before starting progesterone therapy, as it requires a prescription.
