

WSOC TV: Reporter Shares Shingles Experience in Chapter 9

Description

Jonathan Lowe, a reporter for Channel 9, recently shared his personal battle with shingles, a painful and debilitating medical condition that affects more people than many realize. It is estimated that 1 in 3 individuals will develop shingles in their lifetime, especially if they have had chicken pox in the past. Shingles occurs when the virus from chicken pox reactivates later in life, causing symptoms like blisters, itching, and severe nerve pain.

Lowe recounted his experience with shingles, emphasizing the extreme discomfort and unexpected complications he faced. Despite initially mistaking his symptoms for a mild illness, Lowe soon realized the seriousness of the situation as the pain intensified. He eventually developed Bell's palsy, a side effect of shingles that left him with facial nerve damage.

Lowe's story serves as a reminder of the importance of considering the shingles vaccine, even for younger individuals. While the vaccine is typically recommended for those aged 50 and over, Lowe encourages people of all ages to consult with their healthcare providers about the vaccine to avoid experiencing the challenges he faced.

Vocabulary List:

Vocabulary quizzes

Multiple Choice (Select the Correct answer for each question.)

1. What activity involves examining analyzing and researching?

-
- Option: Eating
Option: Investigating
Option: Sleeping
Option: Playing
2. What is a method to prevent or provide immunity to a particular disease?
- Option: Medication
Option: Vaccination
Option: Exercise
Option: Surgery
3. Which medical condition is caused by the reactivation of the varicella-zoster virus?
- Option: Migraine
Option: Shingles
Option: Diabetes
Option: Asthma
4. What is the condition in which blood clots form in a blood vessel?
- Option: Hypertension
Option: Asthma
Option: Thrombosis
Option: Arthritis
5. Which term describes a condition where the body's immune system attacks its own cells?
- Option: Contagious
Option: Autoimmune
Option: Vaccination
Option: Detection
6. What is the body's response to injury or infection characterized by redness swelling and pain?
- Option: Regulating
Option: Inflammation
Option: Composition
Option: Monitoring
7. Which proteins help the body's immune system recognize and fight off pathogens?
- Option: Antibodies
Option: Enhancing
Option: Consult
Option: Lymphoma
8. What are unforeseen or abnormal outcomes or issues that arise during a medical condition?
- Option: Rare

- Option: Complications
- Option: Adenovirus
- Option: Genetic

9. Which term relates to the nervous system particularly the brain and nerves?

- Option: Indicators
- Option: Neurological
- Option: Autoantibody
- Option: Monitoring

10. What type of antibody mistakenly targets a person's own tissues as if they were pathogens?

- Option: Detection
- Option: Autoantibody
- Option: Indicators
- Option: Regulating

Gap-Fill (Fill in the blanks with the correct word from the vocabulary list.)

11. _____ with health authorities can help prevent the spread of infectious diseases.
12. Regular exercise is key to _____ one's overall health.
13. Fever and fatigue are common _____ of an underlying infection.
14. The endocrine system is responsible for _____ various bodily functions through hormone release.
15. Doctors recommended closely _____ the patient's vital signs after surgery.
